Switchable Privacy Filter
*(Available & optional for Portégé X40-G)*

Magnesium & HoneyComb Chassis

MIL-STD-810G strong

Expanded capability with new Type-C™ Gen 2 port with Thunderbolt™ 3

## PRODUCT HIGHLIGHTS

### Power In A Slim Package
With Portégé X30-G at 15.9 mm thin and 1.05 kg light, and Portégé X40-G at 16.9mm thin and 1.25kg light, the new series helps you power through any task, anywhere. The innovative Intel® Optane SSD shortens waiting times and speeds up your output, while the latest Intel® WiFi 6 modules offer improved security, higher throughput and improved network capacity. Their new S-Type cooling system works tirelessly and quietly to protect against overheating.

### Work With Confidence
Tested extensively to withstand the bumps and strains of mobile working, the Portégé X Series is also built with security at its core – and our own unique in-house BIOS is the foundation. With two-factor authentication, including IR-based Windows Hello™ and fingerprint reader, the devices are easy to access in the right hands, and almost impenetrable in the wrong ones. A camera shutter slider assures your privacy. An optional dynamic privacy filter supported on the Portégé X40-G lets you instantly restrict the viewing angle of your screen, so your work is for your eyes only.

### The World Is Your Office
When you're working on the move, you need a laptop that can keep up. That's why we equipped the Portégé X series with a non-reflective screen including optional In-Cell Touch technology – so whatever the lighting conditions, you can access content fast and watch it with clarity. With Harman/Kardon® speakers with DTS® sound producing quality audio, HDMI port that allows you to share on-screen content with a larger display or TV, the X series delivers stunning audio-visual performance that makes all the difference to your presentation.

### Fast As Lightning
The Portégé X series is always ready to work: with modern standby and a wake on fingerprint feature, you can access information in seconds without having to wait for your laptop to reconnect. Twin Thunderbolt™ 3 ports connect you to your peripherals in record time. So whether you're plugging in a mouse, uploading information, or sharing a presentation at a client's office, nothing can slow you down.

*Battery life rating based on MobileMark 2014 Office Productivity, powered by Intel® Core™ i7 vPro processor.
†Weight may vary depending on product configuration, vendor components, manufacturing variability and options selected.
^Depends on configuration.
